Regular and Sale prices

It is our aim to make our pricing practices as clear as possible and to give you information about the values being offered. The following are explanations of price terms used in this catalogue.

Eaton Regular is the catalogue selling price of an item for the life of this book.

Eaton Price identifies a sale price for those catalogue items which Eaton's believes to be of better value than similar items generally available. Every effort is made to make these values as valid as possible. They do not take into account local pricing situations of like or similar items in all communities.

Comparative Prices—Eaton Regular, when used with Eaton Price to form a comparative price refers to the price at which the identical item was offered in an Eaton's Catalogue within the preceding 12 months in your geographical zone.

Guaranteed Life Plan

EATON LIFE

Family Protection

Guaranteed Life Plan:
Cash value life insurance for men and women 45 to 85 at less than $100 a year!

Eaton Life now makes it easy for people over 45 to obtain life insurance – *without a medical!* All you have to do is fill out our brief application form and return it to us together with $1.00. You will be insured from the moment your application, *accompanied by your cheque or money order for $1.00,* is received at the Head Office of Eaton Life.

The amount of your policy's protection depends on your age at application. Check the chart below for *your* protected amount. Remember . . . *this amount will not change for the life of your policy.*

Following acceptance of your application, you pay a monthly premium of just $7.95 for as long as you want or need this protection. Think about it – *life insurance with cash values for less than $100 a year. And only you can cancel!*

Guaranteed Life Plan gives you these 3 most-wanted benefits:

1. Immediate Accidental Death Benefits

If you should suffer a fatal accident, your family will receive benefits in the *full amount* of your protection – even if you have just enrolled in the Guaranteed Life Plan. You are protected immediately – *24 hours a day, anywhere in the world.* Nothing can replace you, of course, but it's comforting to know that your family is entitled to this benefit the moment your Guaranteed Life Plan is in force.

2. "Builder Benefits" Protection

Builder Benefits protect your family in the event of your death from any cause other than accident. These benefits apply immediately, and increase in this manner: in the first year of your policy the death benefit is the amount of your premiums paid to the time of death; in the second year the benefit increases to 35% of the full protected amount; in the third year 65% of the full amount; and after three years, 100% of the full protected amount. *Full protection for all causes of death after only 3 years – for the rest of your life!*

3. Increasing Cash Values

The cash value of your policy begins to grow after your policy has been in effect two years. *It continues to grow for the life of your policy.* Consider it your emergency fund or special savings account – you can borrow against it if you need to, or cash it in if you so desire. It's a nice "nest-egg" to have around when the unexpected happens.

If you need more protection, you may DOUBLE YOUR COVERAGE and pay a premium of only $14.95 PER MONTH

That's right! Eaton Life will allow you to *double the protected amount* you qualify for *without doubling your premium.* If you need this extra protection, it can be yours for a monthly premium of just $14.95. Indicate your preference for **Double Coverage** on the Application Form.

$7.95* a month gives you the protection shown below for your age at application

*You pay a monthly premium of $14.95 for *Double* the Protected Amount shown for your age at application.

†If you are a woman, deduct 2 years from your current age to determine your Protected Amount. For example, if you are age 59, look under age 57 for your Protected Amount. Ages 43 and 44 are shown for the benefit of female applicants aged 45 and 46.

Cash Values are available from the beginning of the second policy year and grow in each subsequent year your policy remains in force. For example, if you were age 50 at issue, your policy's cash value grows to $938.70 at the end of 20 years; if age 55 at issue, the cash value grows to $805.22 at the end of 20 years.

Note: Benefits payable on non-accidental death during the first three years of the policy are limited to refund of premiums if death occurs in the first policy year, 35 per cent of the Protected Amount if death occurs in the second policy year, and 65 per cent of the Protected Amount if death occurs in the third policy year.
